# Key Projects

## IntelliSMS

## High-performance SMS broker

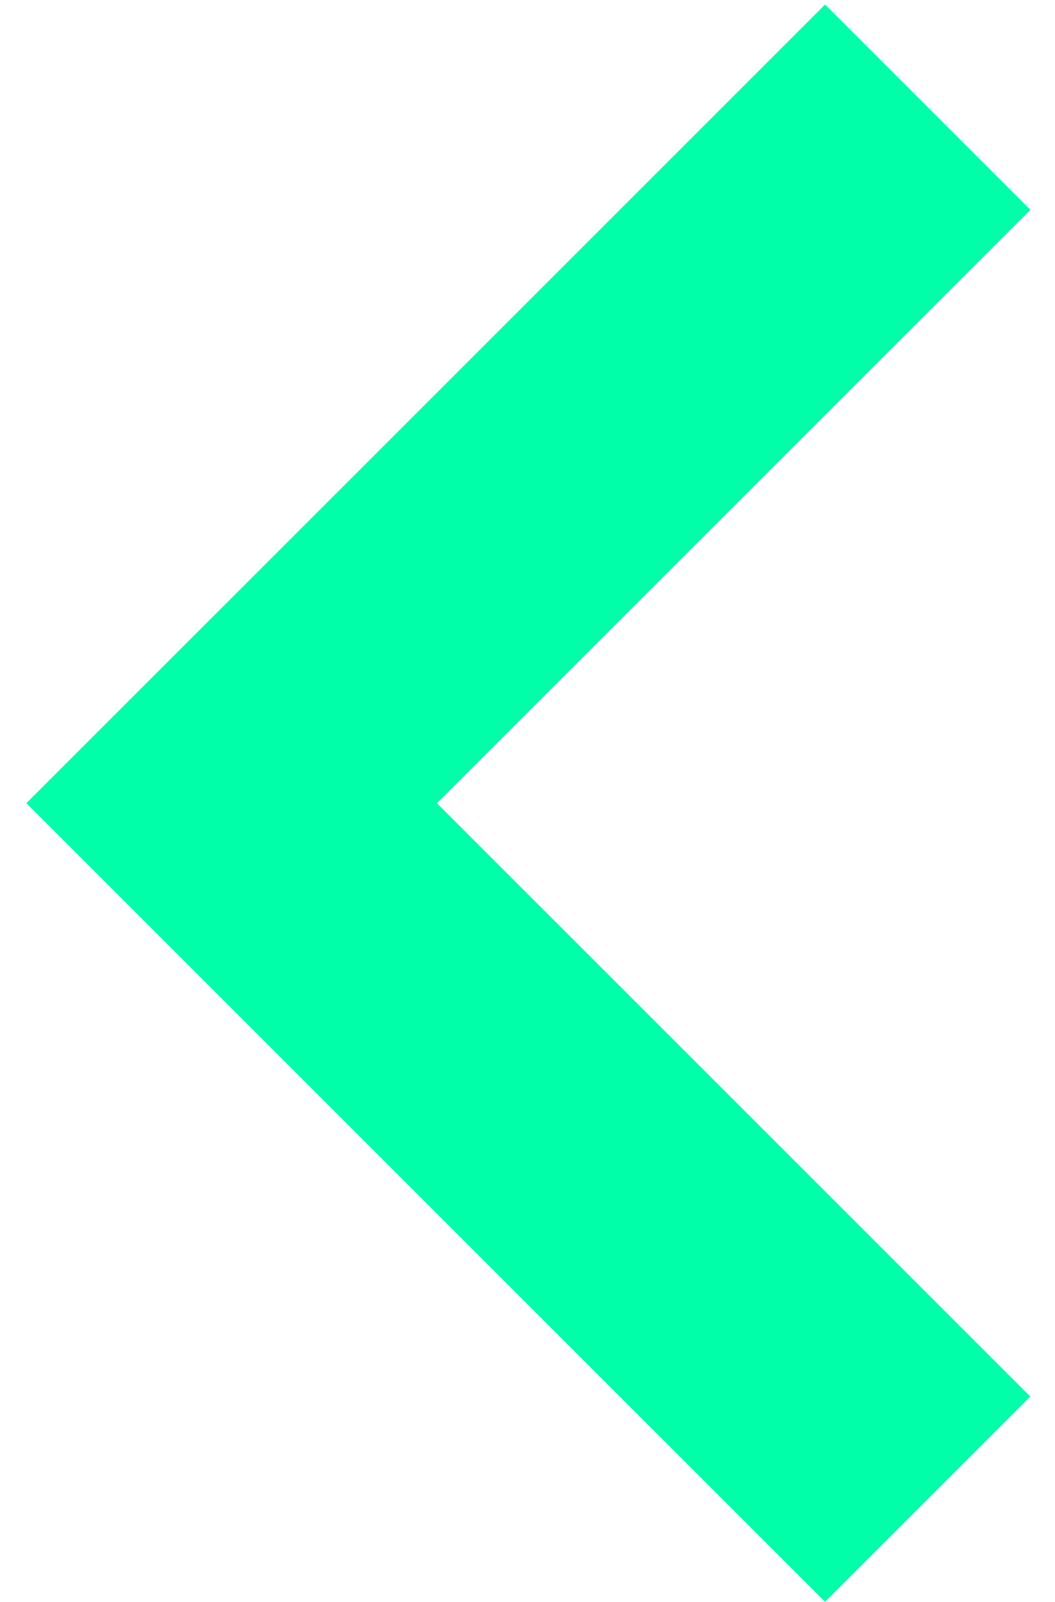

# Management

---

“The founders of SoftwareMill are all easy going, driven individuals, whose persistence over time has resulted in SoftwareMill becoming a figure of authority in the industry, especially in terms of their incredible technical knowledge.

Even though SoftwareMill are eager to grow and work on new and exciting projects, the founders have managed to preserve a great company culture, with a flat organizational style. These solid foundations shine through the company and in turn, benefits their clients greatly.”

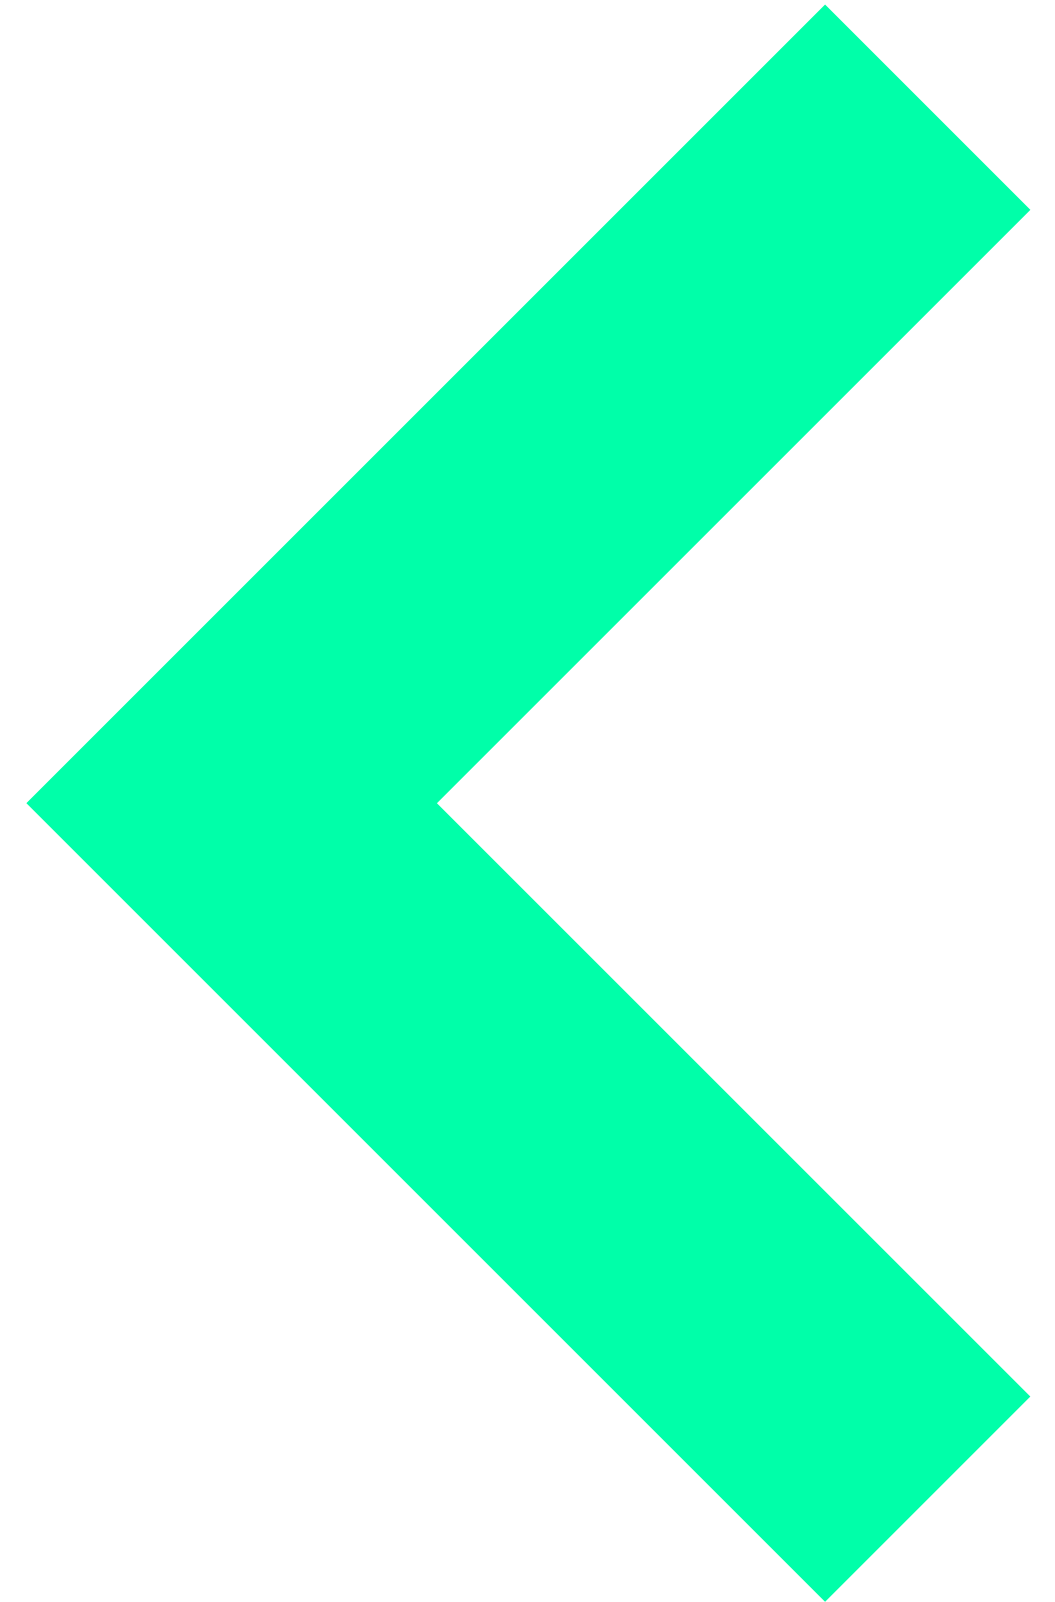

# Team

---

“The team is eager, talented and committed - they benefit from a good, collaborative working environment, with great transparency towards clients and projects.

Through short conversations, it is 100% clear that the team has deep product & technical know-how; this can be attributed to their strategy for identifying and onboarding top talents and keep them updated through continuous learning”

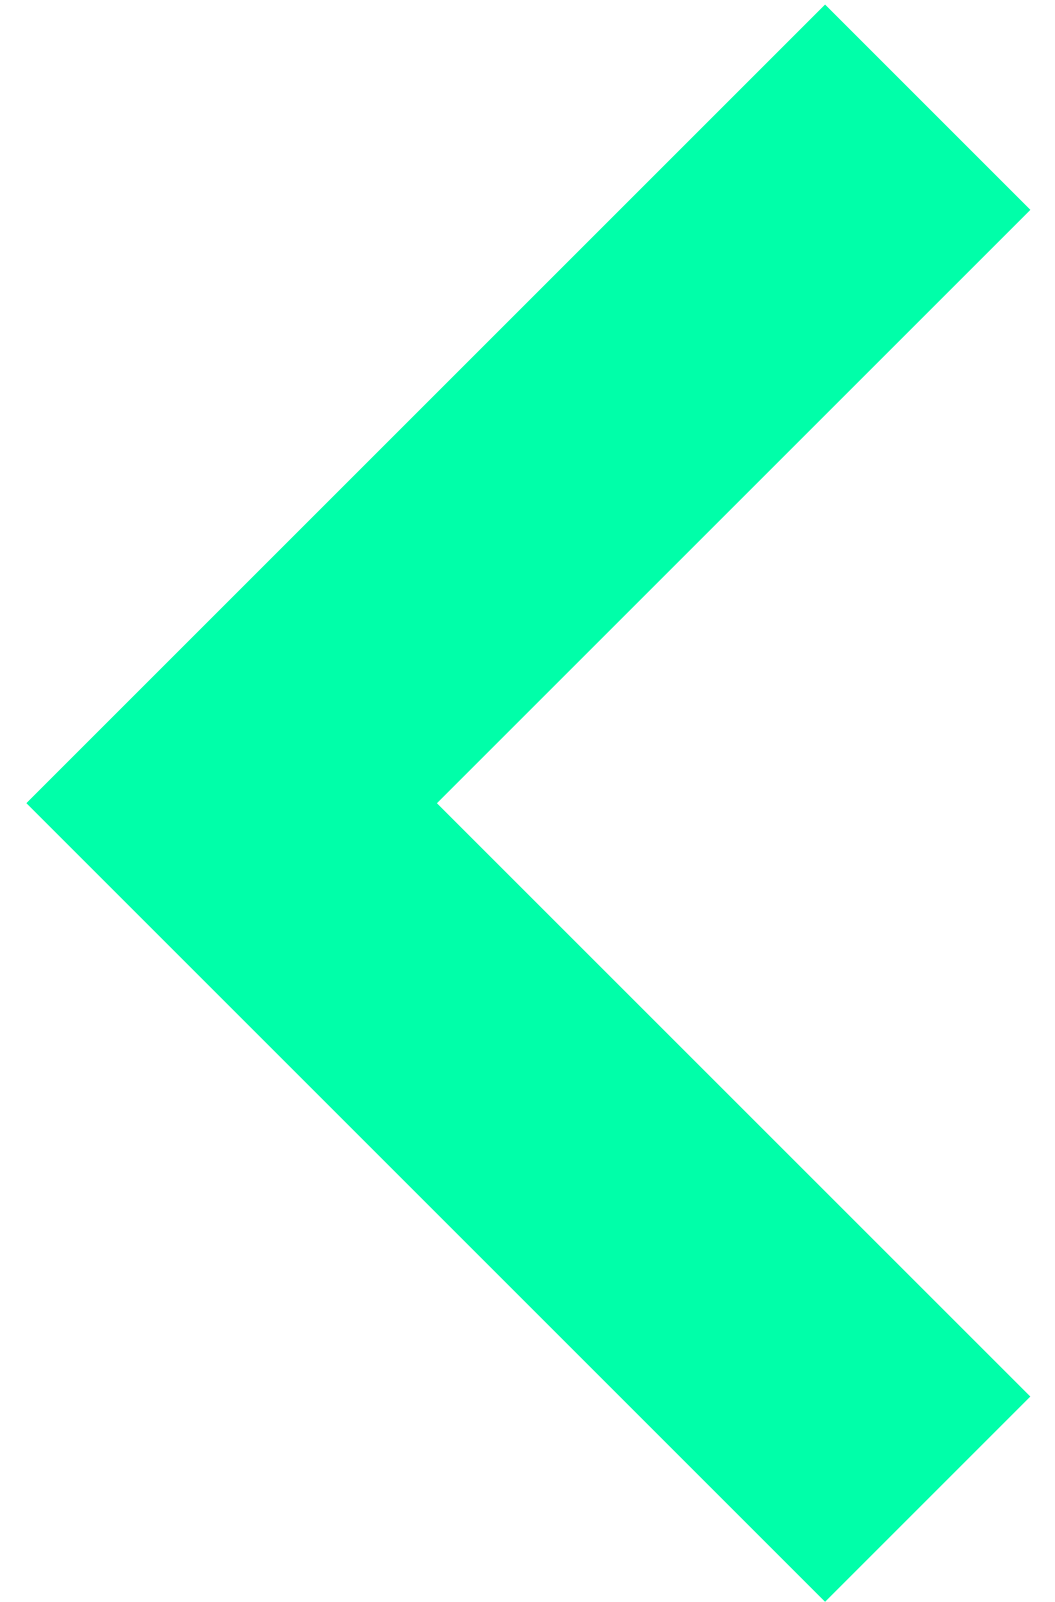

# Technology

---

“SoftwareMill has powerful, extensive and ever expanding technology stack which includes Akka, Java, Scala, Python and Cassandra, to name a few.

They are always looking for new technical skills to expand their knowledge, which is extremely important in these fast moving times.”

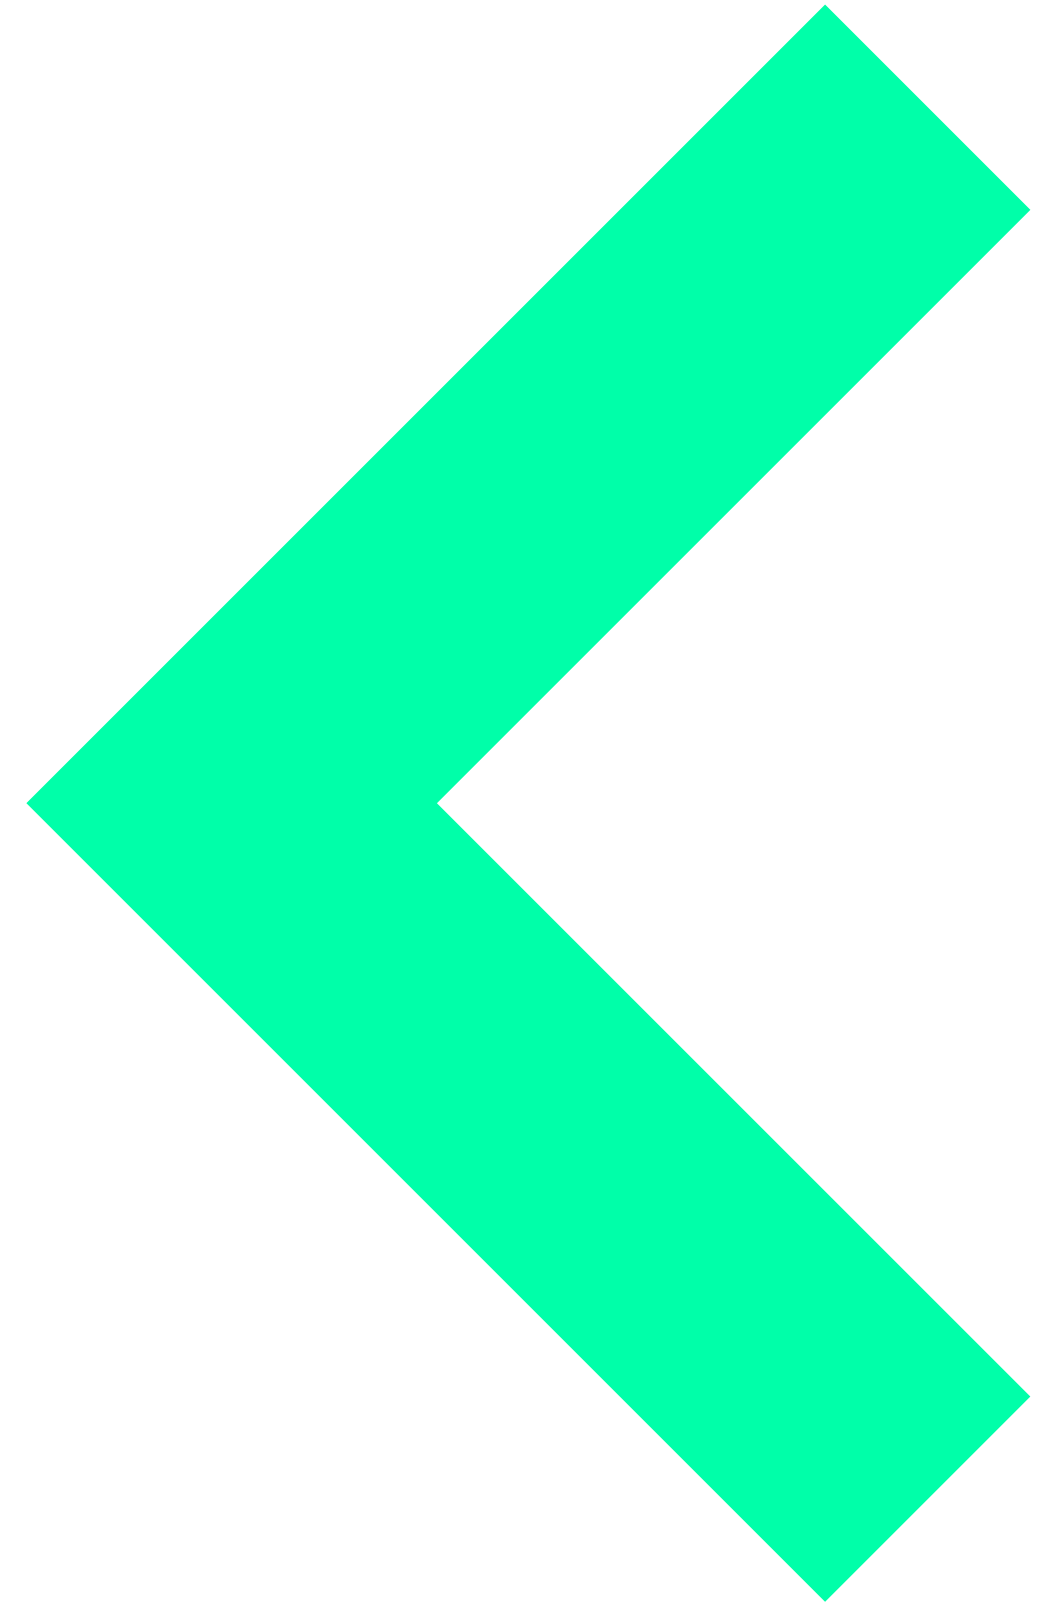

# Customer Feedback

---

“SoftwareMill created a great bridge between business and technology. Not only did they built amazing software for my firm, however, they were also involved with guiding me throughout the process, and their input really helped create this company.”

“At SoftwareMill, things happen quickly! The communication between us was second-to-none, they continuously worked extremely hard and were always there to answer any queries from my end, immediately.”

“An extremely friendly, nice and genuine team. They are great at explaining their tasks to non-technical people, which was a breath of fresh air for someone like me who had no technical experience.”
