High-performance SMS broker

# Management

---

“The founders of SoftwareMill are easygoing, driven individuals whose persistence over time has led SoftwareMill into becoming a figure of authority in its industry, especially in terms of the team’s incredible technical knowledge.

Although SoftwareMill is eager to grow and work on new and exciting projects, the founders have also managed to preserve a great company culture with a flat organizational style. These solid foundations shine throughout the company and in turn, greatly benefit its clients.”

# Team

---

“The team is eager, talented, and committed - it benefits from a good, collaborative working environment, with great transparency towards clients and projects.

Through direct conversations, it is 100% clear that the team has both product and technical know-how; this can be attributed to its strategy for identifying and onboarding top talent and keeping its individuals up to date through continuous learning efforts.”

# Technology

---

“SoftwareMill has powerful, extensive and ever-expanding technology stack that includes Akka, Java, Scala, Python, and Cassandra to name a few.

The team actively looks to add new technical skills and expand its knowledge, an increasingly important trait in these fast moving times.”

# Customer Feedback

---

“SoftwareMill created a great bridge between business and technology. Not only did they built amazing software for my firm, but they were also involved with guiding me throughout the process, and their input really helped create this company.”

“At SoftwareMill, things happen quickly! The communication between us was second-to-none, they continuously worked extremely hard and were always there to answer any queries from my end immediately.”

“An extremely friendly, nice, and genuine team. They are great at explaining their tasks to non-technical people, which was a breath of fresh air for someone like me who had no technical experience.”
